Established in 1991, MCID is a designated Foreign Trade Zone (FTZ) and is the only water to rail facility in Detroit

Established in 1991, MCID ships cargo anywhere in the world, just-in-time and defect free. The warehousing and distribution facility, the only water to rail facility in Detroit, is a designated Foreign Trade Zone (FTZ). Transportation is provided by water, rail or highway.

The federal government's Foreign Trade Zone Program (FTZP) provides a variety of import and export benefits. Qualified companies can improve cash flow, lower inventory cost and improve their bottom lines through deferring, reducing or eliminating customs duties. JGI professionals can

position your company to exploit the benefits offered by FTZP. Assistance is provided through the application process, activation period and continuing foreign trade zone operations. Contact us for a savings analysis specific to your company.
